

Using LockMagic in Education

LockMagic

Case Study

The Customer

The threat of cyber-attacks is prevalent in every institution that handles a large number of clients or personnel. So, it's no shock that schools are vulnerable to such threats. The student, employee and administrative data is at risk. We at MOSECO have the perfect solution for you. Lockmagic is a unique software solution that provides end-to-end encryption for your local & shared files, email messages, attachments and various desktop file formats. With an identity-based encryption model; users simply specify the email address of the intended recipient(s) to share the encrypted content with and Lockmagic will take care of the rest. Lockmagic is a fully transparent solution where you're not required to change the way you work to achieve the goal of securing your files and communication.

The Challenge

Here are some of the cyber threats faced by schools and academic institutions face:

- Accidental loss or damage to assets
- Unauthorized or unintended modification or disclosure of personal and/or confidential information or other misuses
- Breach of information or any deliberate and harmful acts carried out through lack of awareness of their consequences

The Solution: LockMagic

We at Lockmagic completely are aware of these issues and we developed a unique software solution to overcome these issues within the educational sector.

- Lockmagic seamlessly integrates with Office 365, OWA, One drive, Gmail, Google drive, etc.
- Lockmagic will help the system comply with requirements that are based on HIPAA, GDPR, Cyber Security Guidelines for School's Technical Staff and Qatar's Information Security Framework for School Networks.
- Since LockMagic is available on premise and on cloud, it can take care of the school databases with ease. This will allow secure and remote access to the database. (Information Security Framework for School Networks Version: 1.2)
- Automated expiry policy and DRM are features of LockMagic that will make it easier to share devices among staff and students. (Personal data or any other confidential data transferred to a portable device should be encrypted and must be removed before the device is made available to another person in accordance with Qatar National Information Assurance Policy NIA.)
- Lockmagic have references and success stories both globally and locally (within Qatar)
